

A POPULIST'S VIEW.

The Juvenile Witness.
The late Mr. Isaac Butt, Q. C., M. P., was fond of relating two answers which he himself heard given to the late Chief Justice Lefroy, lord chief justice of Ireland, by children. In the first instance a little boy, whose testimony was of importance in a case of riot between Protestants and Catholics, was asked what would happen to him if he did not tell the truth. "When I die, sir," was the reply, "I should go where the Catholics go." On a similar question being put to an intelligent little girl, she replied, after a pause, "If I were I should not get my expenses."

Westminster Gazette.

"We cannot be robbed by a protective tariff and still be free. We must take the robbery by the throat, and by a judicious legislation and turns it over to campaign committees to buy votes with, the very life of free government is assailed. Nations do not go down to death in the momentous sweep of nature, they are destroyed by the poison which the lobbyist and the voter buy infuse into the body politic.

"The mad riot of protection will soon be over. The evidences of the revolution which shall destroy it are now everywhere. It is the maddest and the most unwise of what self interest and audacity and effrontery can accomplish as against the people not united by any bonds save those of the public welfare."

If the weather happens to be threatening on the eve of shearing day the flock may be housed. But ordinarily the sheep are brought in from the fields in the early morning with the dew still on the fleece. A shepherd dog may be used in driving, but at the present day the trained coveys are rather few and stockmasters have suffered so much from "sheep dogs" that they are inclined to

Still another class of visitors that is to be entertained comprises the politicians of the district. They are well aware of the advantage of the sheep shearing season in catching numbers of voters together and the county primaries are coming on when delegates will be in demand. The wool growers' vote in several States is of special importance, and they catered to as a class.
